

## National Emergency Laparotomy Audit

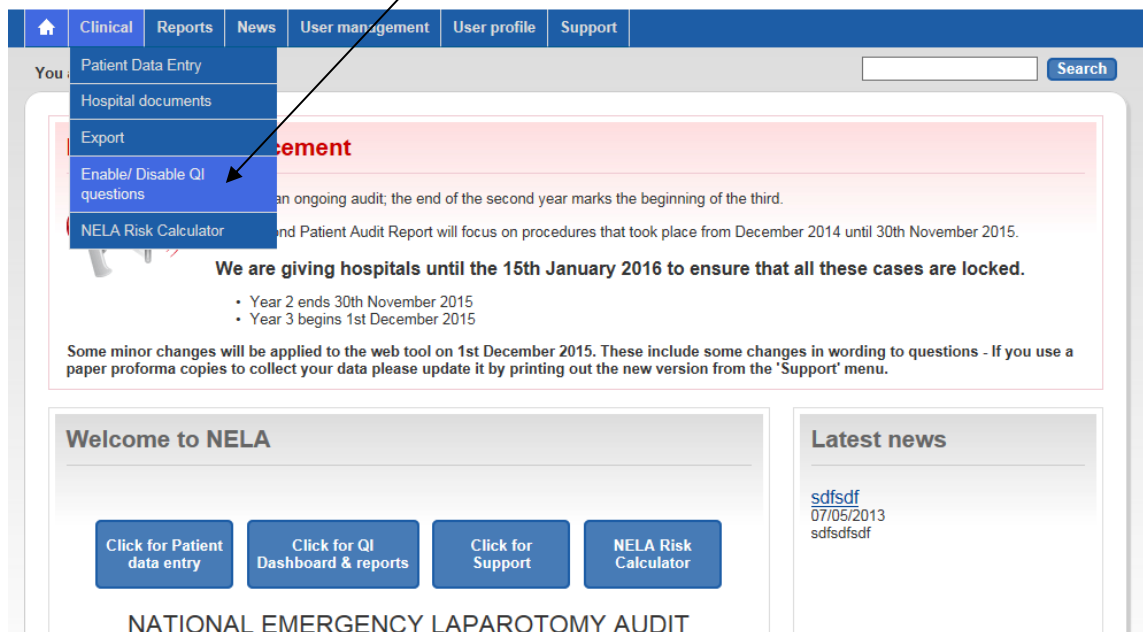

### NEW – How to Enable/Disable Quality Improvement (QI) Questions on Webtool

As the NELA local administrator, you have access to the admin screen of the Data Collection Webtool. Alongside having responsibility for adding new users on to the system so that they can login and input data you now can also access to 'Disable' or 'Enable' the QI Questions on the Webtool.

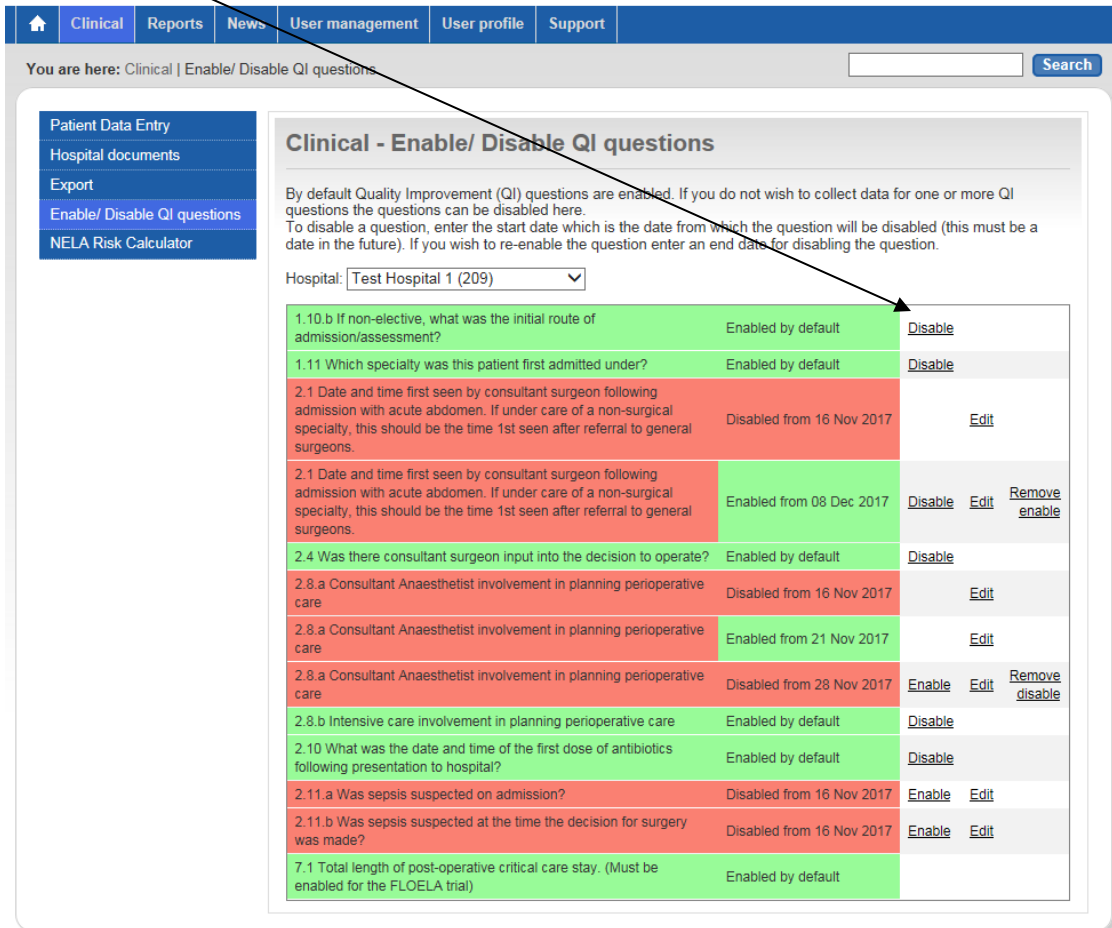

By default, the Quality Improvement (QI) questions on the NELA Webtool are enabled. However if you do not wish to collect data for one or more QI questions the questions can now be disabled. To disable a question, enter the start date, which is the date from which the question will be disabled, (this must be a date in the future). If you wish to re-enable the question, enter an end date for disabling the question.

Process of how to use this function:

1. Once you have logged in as normal, you can click on the 'Clinical' tab and an extra option will appear called 'Enable/Disable QI Questions'.

- If you click on 'Enable/Disable QI Questions' – a list of all the QI questions will appear. They will all be in green as they are all enabled by default. If you wish to Disable a question click on Disable.

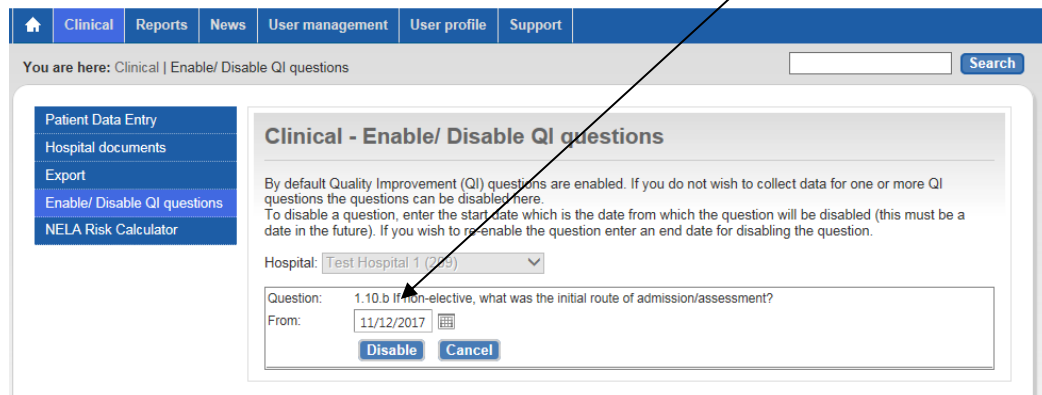

**Clinical - Enable/ Disable QI questions**

By default Quality Improvement (QI) questions are enabled. If you do not wish to collect data for one or more QI questions the questions can be disabled here.  
To disable a question, enter the start date which is the date from which the question will be disabled (this must be a date in the future). If you wish to re-enable the question enter an end date for disabling the question.

Hospital:

1.10.b If non-elective, what was the initial route of admission/assessment?	Enabled by default	<a href="#">Disable</a>
1.11 Which specialty was this patient first admitted under?	Enabled by default	<a href="#">Disable</a>
2.1 Date and time first seen by consultant surgeon following admission with acute abdomen. If under care of a non-surgical specialty, this should be the time 1st seen after referral to general surgeons.	Disabled from 16 Nov 2017	<a href="#">Edit</a>
2.1 Date and time first seen by consultant surgeon following admission with acute abdomen. If under care of a non-surgical specialty, this should be the time 1st seen after referral to general surgeons.	Enabled from 08 Dec 2017	<a href="#">Disable</a> <a href="#">Edit</a> <a href="#">Remove enable</a>
2.4 Was there consultant surgeon input into the decision to operate?	Enabled by default	<a href="#">Disable</a>
2.8.a Consultant Anaesthetist involvement in planning perioperative care	Disabled from 16 Nov 2017	<a href="#">Edit</a>
2.8.a Consultant Anaesthetist involvement in planning perioperative care	Enabled from 21 Nov 2017	<a href="#">Edit</a>
2.8.a Consultant Anaesthetist involvement in planning perioperative care	Disabled from 28 Nov 2017	<a href="#">Enable</a> <a href="#">Edit</a> <a href="#">Remove disable</a>
2.8.b Intensive care involvement in planning perioperative care	Enabled by default	<a href="#">Disable</a>

7.1 Total length of post-operative critical care stay. (Must be enabled for the FLOELA trial)	Enabled by default	

- You will then be asked the date you wish to Disable the question from.

**Clinical - Enable/ Disable QI questions**

By default Quality Improvement (QI) questions are enabled. If you do not wish to collect data for one or more QI questions the questions can be disabled here.  
To disable a question, enter the start date which is the date from which the question will be disabled (this must be a date in the future). If you wish to re-enable the question enter an end date for disabling the question.

Hospital:

Question: 1.10.b If non-elective, what was the initial route of admission/assessment?

From:

[Disable](#) [Cancel](#)

- Once you have done this on the main list of QI questions, the question you have disabled will go red with text saying 'Disabled from...'. The question remains green until the actual date it is disabled. The question will remain disabled unless you add an end date by pressing Enable and adding a date.

**Clinical - Enable/ Disable QI questions**
